

A Guide to Sharps Disposal

Protect Yourself - Protect Others - Protect the Environment

Managing Home-Generated Sharps

- Sharps should be placed into an approved container immediately after use.
- Do not attempt to remove, bend, break or recap the needle.
- Keep all sharps and disposal containers out of reach of children.
- Don't throw used needles, syringes or lancets in the garbage, recycling or green-waste containers.
- Don't flush needles down the toilet.
- Bring your $\frac{3}{4}$ filled sharps container to the locations listed below or other approved sites (do not overfill).

Approved Sharps Containers

The FDA recommends that used needles and other sharps be placed in FDA-cleared sharps disposal containers, go to www.FDA.gov and enter 'sharps disposal containers' in the search box. FDA-cleared sharps disposal containers are generally available through pharmacies, medical supply companies, health care providers, and on-line.

Other Resources to Consider:

- Your doctor's office or hospital may collect only their patients' sharps (but check first).
- Check the California's Department of Resources Recycling and Recovery's (CalRecycle) website: www.CalRecycle.ca.gov and place 'sharps' in the search box to find a listing of drug manufacturer's mail-back programs, some of which may be free.

Other businesses and facilities that take back home-generated sharps waste can be found through:

1-800-CLEANUP (1-800-253-2687)

www.Earth911.org

The California Department of Public Health Medical Waste Management Program maintains a list of home-generated sharps consolidation points in the state on-line at www.cdph.ca.gov.

Mail-Back Services for a fee:

- GRP & Associates www.sharpsdisposal.com (800) 207-0976
