

**EDIBLE FOOD RECOVERY CONSULTANT  
FOR THE WEST CONTRA COSTA INTEGRATED WASTE MANAGEMENT AUTHORITY**

**Consultant Request for Proposal (RFP)  
Questions and Answers**

**Question 1:**

**Can RecycleMore clarify what they are looking for from proposers regarding item 7 on the list of tasks, “Assist with organizing the data obtained during county records inspections”?**

**RecycleMore Answer:**

RecycleMore is considering contracting with Contra Costa County to perform the required edible food generator contract and records inspection process. This program is still under development and will not be a large part of this consultant project. A consultant that brings some knowledge of the new edible food recordkeeping requirements and can advise RecycleMore during that process, will be sufficient.

**Question 2:**

**Is RecycleMore open to approaches that propose phone/email outreach to select edible food generators and recovery organizations as opposed to only in-person visits?**

**RecycleMore Answer:**

While RecycleMore feels that in person site visits will be more effective in reaching decision makers and obtaining needed information, RecycleMore is willing to accept proposals that include a hybrid approach that includes some phone and email inquiries. If these phone and email inquiries are inconclusive, site visit attempts will need to be conducted.
